

Premises Data Management System (PDMS)

PDMS basically handles various functionalities of General and Administration Wing related to “Short Leased”, “Long Leased” and “Own” properties of the bank. This includes fixing/renewal/shifting to alternate premises of Branches, Administrative Units, Currency Chests, Service Units, ATMs, Godowns, and Residential Quarters etc. This software has been developed in C#.net technology and Oracle 11g database.

“Short Leased” Premises have the following functionalities:

1. Premises maintenance
2. Floor wise details maintenance
3. Lease details maintenance
4. Rent details maintenance
5. Property tax maintenance
6. Documents upload
7. Office notes for fixing/renewal/shifting of premises
8. Various MIS reports

“Own” and “Long Leased” Properties have the following functionalities:

1. Properties maintenance
2. Buildings maintenance
3. Floor wise details maintenance
4. Lease details maintenance
5. Documents upload
6. Revaluation details
7. Repairs, Maintenance details
8. Tax details
9. Disputes and Hearing details
10. Sales details
